Department of Cardiology,  
All India Institute of Medical Science  
New Delhi, India.

## Associate editors

**Dr Mitrakrishnan R Navinan**  
Senior Registrar  
Institute of Cardiology, National Hospital of Sri Lanka.

**Dr Thamal D P Vithanage**  
Senior Registrar  
Institute of Cardiology, National Hospital of Sri Lanka.

## *Scope of the journal*

by

**Dr Ruvan A I Ekanayaka**

The scope of this journal will be broadly based in order to realize three objectives.

First and foremost the objective is to publish high quality research which deals with problems which are of universal relevance but with greater focus on work targeting locally relevant problems.

Secondly, the journal will be a forum for cardiologists and other specialists to share their clinical experiences via case reports. Most cardiologists have cases worth reporting for their value in providing insights into pathophysiology, guiding selection of therapeutic pathways and shedding light on problem solving. The journal will encourage such case reports.

The third objective is for this publication to be a fruitful avenue of Continuing Medical Education (CME). The lack of time should not be a limiting factor to assimilate knowledge. The journal will utilize reviews, tutorials, journal scans and updates to provide a well-balanced CME course in Cardiology.
